PHC 7587: Theory Development and Testing in Behavioral & Community Public Health (2 credit hours)
College of Public Health & Health Professions Syllabus
University of Florida
Spring 2026
Classroom: HPNP G-108
Wednesday, Periods 5-6 (11:45 AM - 1:40 PM)
Delivery Format: Face-to-face, On-Campus.
Course Website: UFL E-Learning

Instructor: Lindsey King, PhD, MPH, CHES, CCRP, CTTS
Office: HPNP 3117 (3rd floor)
Email Address: Linking@ufl.edu
Office Hours: By appointment (please email to set up an appointment)

Preferred Course Communications: Email.

Email Policy: Direct Outlook email (Linking@ufl.edu) is the preferred method of communication, ***not the message function within Canvas***. Response within 24 hours to emails received on weekdays (M-F). Emails received during the weekend or after 5pm on Friday will be answered by 1pm on the following Monday.

Class Limits: Limited to SBS PhD students, PhD students in the social sciences, or consent of instructor

PURPOSE AND OUTCOME

Course Overview

The purposes of this class are to (1) familiarize students with the process of theory development, (2) allow students the opportunity to review and orally present on a psychosocial construct(s) relevant to their own public health research goals, and (3) allow students the opportunity to practice written and oral communication skills.

This course uses a ***student-led discussion format***, and each student will lead discussions during the semester. First, students will be asked to summarize and lead a discussion on a chapter from the textbook and articles used in the course (this will be done twice per semester per student). Second, students will be asked to (1) select key readings that illustrate the use and measurement of a selected psychosocial construct, (2) lead a group discussion on psychometric, methodological, and analytic issues concerning the construct, and (3) draw and present a graphic depiction of a model using the construct. Central to the discussion will be a consideration of how the construct performs in understanding a public health related outcome within the student's area of research.

There will be two large products resulting from this course: 1) a presentation of a theoretical model developed throughout the semester and 2) either a detailed research proposal written up for submission OR a tested model written up as a manuscript for publication.

Course Objectives:

By the end of the semester, students will have:

1. Described the history, measurement, and use of a psychosocial construct that is important to public health research.
2. Developed a model of how a selected construct is involved (e.g., main effect, moderator, or mediator) in the theoretical explanation of a public health-related behavior.
3. Developed a testable hypothesis from this theoretical model.
4. Selected and appropriately applied statistical tests to evaluate this hypothesis.
5. Orally presented the results of their theoretical model development and hypothesis testing.
6. Drafted a proposal or manuscript based on these results ready for submission (e.g., to a peer-reviewed journal).

Instructional Methods:
As a doctoral seminar, this course will meet once per week. Class time will focus on active discussion of assigned readings. Additional time will be set aside to apply materials, work on course projects, and provide peer-review and feedback to other students.

What is expected of you?
The success of this course depends in large part on your level of preparation and participation. You are expected to actively engage in the course throughout the semester, completing all assigned readings prior to coming to class. On many weeks, additional required readings will be posted on Canvas; please make sure to check Canvas regularly.

DESCRIPTION OF COURSE CONTENT

Course Schedule: This course will meet weekly on Thursdays during periods 3 and 4 (11:00 am – 1:45 pm).

Course Materials and Technology:

Instructional materials for this course consist of only those materials specifically reviewed, selected, and assigned by the instructor. The instructor is only responsible for these instructional materials.

Required Textbook: Shoemaker, P.J., Tankard, J.W., Jr., & Lasorsa, D.L. (2004). *How to build social science theories.* Thousand Oaks, CA: Sage Publications. ISBN: 9780761926672

Additional Required Readings: Posted via the course website (Canvas).

Course Website: The course website is available on Canvas and can be accessed through the UF E-learning website. The weekly schedule, additional course materials, and links to submit course assignments and discussion questions are available through this website. You will log into the course website using your Gatorlink ID and password; if you have trouble logging in, please contact the Help Desk at 352-392-HELP.

Announcements: Class announcements will be sent via the announcements tool in Canvas. Depending on your Canvas notification settings, you may or may not be notified via email; ***you are responsible for all information in these announcements*** whether or not you see them in your email. ***Please update your settings so that you are notified of announcements.***

Canvas Technology Requirements: Browser requirements may change; please consult the UF Help Desk to see a list of supported browsers and recommendations for browser configuration. For technical support for this class, please contact the UF Help Desk at:

Email: UF Help Desk Email address
Phone: (352) 392-HELP - select option 2
Website: UF Help Desk

ACADEMIC REQUIREMENTS AND GRADING

Course Components: (Note: Detailed instructions will be provided on eLearning as due dates get closer)

1. **Discussion Questions:** Each week, you are expected to come to this seminar prepared to discuss the required readings. To assist with this preparation (and to help focus the in-class discussion), you are asked to submit at least 2 (3 is encouraged) ***doctoral*** level discussion questions weekly via Canvas during designated weeks (see course schedule and Canvas). Discussion questions are due by ***11:59 PM EST each Tuesday (the night before each class is held).***

2. **In-Class Readings Discussion**: *Twice* during the semester, you will be assigned one or more chapters from the book by Shoemaker et al. as well as any assigned articles for the week to lead a

class discussion. We will sign up for these during the first 2 weeks of class so each due date varies per student. When presenting in class, you will be expected to:

a. Summarize the content of the chapter(s) and article(s) and how they link with ongoing class discussions
b. Lead a class discussion (using 3-5 discussion questions you have prepared as well as any selected from the course Canvas discussion post).

3. **Construct: Selection of Articles:** You are asked to select and make available three peer-reviewed articles focused on your selected psychosocial construct (one each on the construct's history/development, measurement, and use). Articles must be approved by the instructor. Students will read each other's articles prior to that class each student is presenting. We will sign up for these during the first 2 weeks of class so each due date varies per student. ***Articles are due no less than 7 days before the date that you are scheduled to present in class.***

4. **In-Class Construct Presentation:** We will sign up for these during the first 2 weeks of class so each due date varies per student. On your assigned day, you will lead a discussion focused on your psychosocial construct and the articles that you selected. You should start this discussion with a brief presentation, and the presentation and discussion overall should cover the following:
    a. An overview of the construct, why it is a construct of interest, and why it is relevant to public health.
    b. The theoretical/conceptual background of the construct. For example, does it come from a particular disciplinary perspective? Is it associated with any larger theoretical perspectives? Is it similar to other constructs used in the literature?
    c. Measurement challenges of using the construct. Are there good (i.e., psychometrically sound) measures available? Do they need improvement?
    d. Methodological challenges associated with the construct. For example, does it require a certain type of research design (e.g., longitudinal) to study it? Have researchers done a good job in using it?
    e. Plans for using the construct in future research. Bring up any particular issues that may be problematic.
        i. Please end your presentation with a simple visual representation of the proposed theory you plan to test for this course. You should include your construct and at least 2 other variables, showing the relationship among the three variables using mediation or moderator. Be able to explain this to the class for feedback (If you'd like to include additional variables, you can, but for this presentation, you are only required to show three variables). A visual theoretical model should be included.

5. **In-Class Theory Evaluation Presentation:** Each student will present in class on the due date. This will be an informal presentation to the class prior to your final oral presentation to serve as time for you to workshop where you are on your theory and how you plan to evaluate it. This will be a time for the instructor and other students to provide constructive feedback and critique before you present your final formal oral presentation. In the past, students have benefited from opportunities to present/ iterate their project vs. waiting until the final presentation. You do not have to include a background/literature review for this presentation but should be asked to prepare slides for parts "b" and "c" described in your final oral presentation below. **Slides for this presentation should be uploaded to Canvas by 11 am on the due date.**

6. **Final Oral Presentation**: You are asked to prepare a final oral presentation of your theoretical model that will be delivered in class. Your presentation should last for around 12-15 minutes, and should include:
    a. A background/literature review that provides justification for selection of the construct and development/testing of the theoretical model

b. An overview of your proposed theory, including your broader theoretical model and the parts of the model / proposed hypotheses that you would test in a study (include theoretical statements and necessary theoretical/operational definitions and linkages)
c. An analysis plan with justification provided on how this plan will appropriately test your model (e.g., how will you measure your constructs and test the selected hypotheses developed from your theoretical model?)
d. If you have tested these hypotheses: results of your analyses. If you are proposing to conduct a study (i.e., if no data are available): example figures/tables that would represent your hypothesized results.
e. A discussion of your theoretical model and evaluation plan (and, if available, results). Discuss your results and what they mean (or might mean, hypothetically, if you had data and your hypotheses are supported or not supported) in context of your theory and the broader literature related to your selected construct(s). Include a discussion of the overall strengths/weaknesses of your methods and evaluation plan in this discussion and discuss potential implications and future directions.
f. Each student will present in class on the due date. **Final slides for this presentation should be uploaded to Canvas by 11 am on the due date.**

7. **Final Paper**: You have two options for the final paper. Peer review of final papers by classmates is required at multiple points throughout the semester.
    a. If you have available data to test your theoretical model: Using the theoretical model and analysis plan you've developed, test your model and submit a manuscript ready for peer-review. This paper should be written using APA formatting, including an abstract and the following sections: Introduction, Methods, Results, and Discussion.
    b. If you do not have data to test your model: Using the theoretical model and analysis plan you've developed, submit a proposal to conduct a study to evaluate this model. This proposal should be written using APA formatting, including an abstract and the following sections: Introduction, Methods, Results, and Discussion. In your results section, use tables and figures to represent examples that demonstrate your hypothesized results. In your discussion section, discuss what your results might mean if hypotheses are supported or not supported, in context of your theory and the broader literature. Your discussion should also discuss strengths/limitations of your methods and your proposed evaluation plan.
    c. You are required to submit drafts throughout the semester for instructor and peer review. See due dates under "Grading" section below and within the course schedule.

    Submit a draft of intro & methods to Canvas by 11 am on due date.
    Submit a draft of results & discussion to Canvas by 11am on due date.
    Submit a close to final draft to Canvas on by 11 am on the due date.
    Final papers should be submitted via Canvas by 11 am on the due date.

8. **Participation & Attendance**: This doctoral seminar requires ***full*** participation from all attendees in order for it to be successful. Full participation includes ***careful*** reading of all articles and chapters prior to the start of class and coming to class prepared to discuss these readings. ***I understand that emergencies arise, but please make every effort to attend each class, as this is a very small class so your presence is highly valued and important for learning of all participants. Most of our work will be done in class so missing even one class can set us back. If sick, please reach out to the instructor as soon as possible so that arrangements can be made.***

    As part of full participation and attendance within this course, you are expected to *give* and *receive* constructive feedback on your peers' work each week. Feedback is crucial in doctoral education as it enhances learning & research skills, fosters critical thinking, and improves the quality of our research by providing student scientists with specific insights into their work, allowing them to identify their strengths and weaknesses. Feedback facilitates the development of independent research skills, refinement of methods, improvement of academic writing, and advancement of knowledge within the

field. Feedback aids in skill development and fosters a deeper engagement with the research process, leading to more robust research outcomes.

9. **PHHP Days Attendance/ Participation:** Students are required to submit an abstract and present at PHHP Days April 15 & 16. They are required to attend each other's presentations and at least 2 other student presentations during PHHP Days. Students will submit a discussion post covering their experience.

All activities (i.e. discussion posts, exams, and prevention presentation) are due at the times listed. All submissions will be through e-Learning. NO EXCEPTIONS.

Grading

Requirement	Due Date	Points
Discussion Questions	Ongoing, due by 11:59 pm EST each Tuesday	10
In-Class Readings Discussion #1	As assigned per individual students	10
In-Class Readings Discussion #2	As assigned per individual students	10
Construct: Selection of Articles	No less than 7 days prior to your class construct presentation	5
In-Class Construct Presentation	As assigned per individual students	10
Drafts of final paper (intro & methods)	Submitted via Canvas by 11 AM on Wednesday, 3/4	5
Drafts of final paper (results & discussion)	Submitted via Canvas by 11 AM on Wednesday, 3/11	5
In-Class Theory Evaluation Plan Presentation	Submitted via Canvas by 11 AM on Wednesday, 3/25 presentations (& workshopping)	10
Final Oral Presentation	Slides submitted via Canvas by 11 AM on Wednesday, 4/1; presentations in class on Wednesday 4/1	20
Peer reviews	Completed during class throughout semester	5
Final Paper	Submit draft via Canvas by 11 AM Wednesday, 3/25 for peer review workshop; Submit final paper via Canvas by 11 AM on Wednesday, 4/8	30
PHHP Days attendance and participation: Wednesday, April 15th and Thursday, April 16th.	Wednesday, 4/15 and Thursday, 4/16	5
Participation	Ongoing	10
TOTAL		**135**

Point System

Points earned	**≥93**	**90-92**	**88-89**	**83-87**	**80-82**	**78-79**	**70-77**	**68-69**	**66-67**	**60-65**	**58-59**	**≤58**
Letter Grade	A	A-	B+	B	B-	C+	C	C-	D+	D	D-	E

NOTE: Points are **not** rounded up at the end of the semester, and grades are not curved. Please be aware that a C- is not an acceptable grade for graduate students. The GPA for graduate students must be 3.0 based on 5000 level courses and

above to graduate. A grade of C counts toward a graduate degree only if based on credits in courses numbered 5000 or higher that have been earned with a B+ or higher.

Letter Grade	A	A-	B+	B	B-	C+	C	C-	D+	D	D-	E	WF	I	NG	S-U
Grade Points	4.0	3.67	3.33	3.0	2.67	2.33	2.0	1.67	1.33	1.0	0.67	0.0	0.0	0.0	0.0	0.0

More information may be found on the UF grading policy.

Policy Related to Make Up Work
If you have a scheduling conflict that prevents you from fulfilling a certain course requirement, please contact Dr. King as soon as possible. **Late assignments are not accepted** unless arrangements have been made ahead of the due date with the instructor. Any requests for make-ups due to technical issues MUST be accompanied by the ticket number received from LSS when the problem was reported to them. The ticket number will document the time and date of the problem. You MUST e-mail Dr. King within 24 hours of the technical difficulty if you wish to request a make-up.

Policy Related to Required Class Attendance
Please note all faculty are bound by the UF policy for excused absences. For information regarding the UF Excused absences must be consistent with university policies in the Graduate Catalog. Additional information can be found at the UF attendance policies website.

ACADEMIC POLICIES & RESOURCES

Information about University Academic Policies and Resources.

STUDENT EXPECTATIONS, ROLES, AND OPPORTUNITIES FOR INPUT

Inclusive Learning Environment
Public health and health professions are based on the belief in human dignity and on respect for the individual. As we share our personal beliefs inside or outside of the classroom, it is always with the understanding that we value and respect diversity of background, experience, and opinion, where every individual feels valued. We believe in, and promote, openness and tolerance of differences in ethnicity and culture, and we respect differing personal, spiritual, religious and political values. We further believe that celebrating such diversity enriches the quality of the educational experiences we provide our students and enhances our own personal and professional relationships. We embrace The University of Florida's Non-Discrimination Policy, which reads, "The University shall actively promote equal opportunity policies and practices conforming to laws against discrimination. The University is committed to non-discrimination with respect to race, creed, color, religion, age, disability, sex, sexual orientation, gender identity and expression, marital status, national origin, political opinions or affiliations, genetic information and veteran status as protected under the Vietnam Era Veterans' Readjustment Assistance Act."

Diversity Statement
I consider this classroom to be a place where you will be treated with respect, and I welcome individuals of all ages, backgrounds, beliefs, ethnicities, genders, gender identities, gender expressions, national origins, religious affiliations, sexual orientations, ability – and other visible and nonvisible differences. All members of this class are expected to contribute to a respectful, welcoming, and inclusive environment for every other member of the class.

Teaching Philosophy
The aims of graduate school are different from those of undergraduate education. Undergraduate education is concerned primarily with instilling the essential knowledge in a field and—at its best—with preparing students for a lifetime of learning. Graduate education is about turning students into professional public health

practitioners, researchers, and teachers. These different aims correspond to distinct responsibilities for both teachers and learners at the graduate and undergraduate levels. As aspiring professionals, you are responsible for taking initiative to master the key ideas and literature in the field and for seeking out the resources you need. My role is to facilitate your learning and professional development as independent scholars by introducing you to pertinent literature, by challenging you to evaluate and synthesize the material, and by rewarding individual initiative.

Academic Integrity
Students are expected to act in accordance with the University of Florida policy on academic integrity. As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: "**We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity**." You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: **"On my honor, I have neither given nor received unauthorized aid in doing this assignment."** It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For additional information regarding Academic Integrity, please see Student Conduct and Honor Codes information at the Dean of Students Office website or the Academic Expectations information at the Graduate School website for additional details. Please remember cheating, lying, misrepresentation, or plagiarism in any form is unacceptable and inexcusable behavior.

Policy Related to Plagiarism
Plagiarism, as defined in the UF Student Honor Code, will not be tolerated. Plagiarism detection software (e.g., TurnItIn) and other resources may be used to detect plagiarism. Assignments where the instructor deems that plagiarism has occurred may receive a zero grade and may be reported to the Dean of Students office as a Student Honor Code violation. The APA publication manual and the Purdue Online Writing Lab website provide guidelines on avoiding plagiarism.

Self-plagiarism is the reuse of the student's own submitted work, or the simultaneous submission of the student's own work, without the full and clear acknowledgment and permission of the instructor to whom it is submitted. You must be original in composing all assignments in this class. To copy text or ideas from another source (including your own previously, or concurrently, submitted course work) without appropriate reference is plagiarism and will result in a failing grade for your assignment and possibly further disciplinary action. If you plan to use a component of an assignment completed for another class to fulfill a requirement for this class, you must contact the instructor ahead of time to ask for permission and your previous work must be cited and paraphrased.

Artificial Intelligence (AI) Policy
While the ever-changing (and exciting) new developments with AI will find their place in our workforces and personal lives, in the realm of education and learning, this kind of technology does not belong. This is because the use of AI robs us all of the opportunity to learn from our experiences and from each other, to play with our creative freedoms, to problem-solve, and to contribute our ideas in authentic ways. This graduate course is a place for learning and this class is specifically a space for learning how to improve our writing. AI simply cannot do that learning for us. Further, intellectual integrity is vital to an academic community and for my fair evaluation of your work. Therefore, all work completed and/or submitted in this course must be your own, completed in accordance with the University's Guidelines on Academic Integrity. The use of AI on assignments, essays/reflection papers, exams, and quizzes when prohibited by course or college instructions is considered cheating and students are violating the UF Regulations 4.040 Student Honor Code & Student Conduct Code: Student Honor Code and Student Conduct Code.

It is not acceptable to use generative AI for reflective writing, as by its very nature, the process of reflective writing demands that you actively engage in the writing process. Delegating this to a natural

language processing algorithm may produce convincing outputs but does not demonstrate development in your professional practice. Students are responsible for understanding their dynamic data stewardship responsibilities to minimize personal, college, and university risk. UF Integrated Risk Management – CHATGPT Privacy, Factual Accuracy and Usage Guidelines

Turnitin
Academic integrity is a serious issue that has been a growing problem at universities. I have a zero tolerance policy for breaches of academic integrity, including plagiarism and cheating. There are multiple video resources posted on our Canvas site that discuss plagiarism and how to properly quote and cite other people's work. With each assignment you complete you are pledging that you hold yourself and your classmates to the highest standards of academic integrity. I use an online tool called Turnitin to check student work for originality; in other words, your work should be in your own words and not copied from any source. Every student needs to watch the videos on plagiarism and on using Turnitin and needs to check their own Turnitin report, made available through the Canvas site automatically when you submit anything though assignments. You should submit assignments early enough to have time before the due date to make revisions to them if your Turnitin report shows areas of high similarity to online resources. Any student caught cheating or plagiarizing will be reported to the Dean of Students Office and will be subject to academic penalties in the course, at minimum.

Online Faculty Course Evaluation Process
Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online. Students can complete evaluations in three ways:

1. The email they receive from GatorEvals,
2. Their Canvas course menu under GatorEvals, or
3. The central portal at UF Gator Evals website.

Guidance on how to provide constructive feedback is available at UF Gator Evals website for constructive feedback information. Students will be notified when the evaluation period opens. Summaries of course evaluation results are available to students at UF Gator Evals website for public results.
Note: Starting in Spring 2025, the central portal will change to UF Gator Evals website.

Policy Related to Guests Attending Class:
Only registered students are permitted to attend class. However, we recognize that students who are caretakers may face occasional unexpected challenges creating attendance barriers. Therefore, by exception, a department chair or their designee (e.g., instructors) may grant a student permission to bring a guest(s) for a total of two class sessions per semester. This is two sessions total across all courses. No further extensions will be granted. Please note that guests are not permitted to attend either cadaver or wet labs. Students are responsible for course material regardless of attendance. For additional information, please review the Classroom Guests of Students policy in its entirety.

Recording Within the Course
Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor. A "class lecture" is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session. Publication without permission of the instructor is prohibited. To "publish" means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered

published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Honor Code and Student Conduct Code.

SUPPORT SERVICES

PHHP's UPTurn
PHHP's UPTurn (Unified Pathways to Support Wellness) program is a no-cost mental health and wellness program that is offered year-round to all PHHP students (undergraduate, graduate and professional level) and students (from any college) who are enrolled in PHHP courses. UPTurn advisors support students on their wellness journeys by curating individualized plans (resources and support) to help them manage academic, social, emotional, and health-related stress. Interested students are paired with an UPTurn advisor, who meets with each student virtually (Zoom, Teams, phone) or in person (private office/room in HPNP) for a 45-minute consultation, followed by (if desired):

- Up to 4 follow-up skills-building visits
- When needed and appropriate, up to 10 psychotherapy sessions after completion of the 4 follow-up skills-building visits

Note: UPTurn is NOT a crisis/emergency resource. Students who are in crisis are strongly encouraged to use UF's existing crisis support resources. Students can learn more about UPTurn as well as request an appointment. Any questions regarding UPTurn can be directed to UPTurn email address or (352) 273-6850.

Accommodations for Students with Disabilities
If you require classroom accommodation because of a disability, it is strongly recommended you register with the Dean of Students Office and Disability Resource Center within the first week of class or as soon as you believe you might be eligible for accommodations. The Dean of Students Office will provide documentation of accommodations to you, which you must then give to me as the instructor of the course to receive accommodations. Please do this as soon as possible after you receive the letter. Students with disabilities should follow this procedure as early as possible in the semester. The College is committed to providing reasonable accommodations to assist students in their coursework.

Counseling and Student Health
Students sometimes experience stress from academic expectations and/or personal and interpersonal issues that may interfere with their academic performance. If you find yourself facing issues that have the potential to or are already negatively affecting your coursework, you are encouraged to talk with an instructor and/or seek help through University resources available to you.

- The **Counseling and Wellness Center:** 352-392-1575 offers a variety of support services such as psychological assessment and intervention and assistance for math and test anxiety. Visit the Counseling and Wellness Center website for more information. Online and in person assistance is available.
    - Do not wait until you reach a crisis to come in and talk with us. We have helped many students through stressful situations impacting their academic performance. You are not alone so do not be afraid to ask for assistance.
- **U Matter We Care:** If you are feeling overwhelmed or stressed, you can reach out for help through the U Matter We Care website, which is staffed by Dean of Students and Counseling Center personnel.
- The **Student Health Care Center:** The Student Health Care Center at Shands is a satellite clinic of the main Student Health Care Center located on Fletcher Drive on campus. Student Health at Shands offers a variety of clinical services. The clinic is located on the second floor of the Dental Tower in the Health Science Center. For more information, contact the clinic at 392-0627 or check out the Student Health Care Center website.
- **Alachua County Crisis Center:** Crisis intervention is always available 24/7 from the Alachua County Crisis Center at their website or (352) 264-6789

- **University Police Department**: Visit UF Police Department website or call 352-392-1111 (or 9-1-1 for emergencies).
- **UF Health Shands Emergency Room / Trauma Center:** For immediate medical care call 352-733-0111 or go to the emergency room at 1515 SW Archer Road, Gainesville, FL 32608. Visit the UF Health Emergency Room and Trauma Center website.

Interpersonal Violence

University of Florida is a Green Dot campus which means that interpersonal violence of any kind is not tolerated. If you experience any form of violence, I am here to support you. Please do not hesitate to reach out to me directly or contact any of the following offices:

- **Office of Victim Services**
  352-392-5648 (Monday - Friday 8am-5pm).
  352-392-1111 (after business hours and on weekends)
- **Office of Accessibility and Gender Equity**
  352-273-1094
  Office of Accessibility and Gender Equity website
- **U Matter We Care**
  352-294-CARE (2273)
  U Matter We Care email address

Weekly Course Schedule*

**As this is a seminar course with very few students, adjustments may be made to the schedule and/or assigned readings as needed. Canvas modules will have the most up to date materials.*

Week/ Dates	Lecture Topics	Readings	Presentations/ Assignments
Week 1: Jan 14	**Course Introduction**	• Schwartz, M. A. (2008). • Example student final paper of a tested theoretical model • Example student final paper proposal • Please read these articles during week 1, but this week only, you are not required to read them prior to class	• N/A
Week 2: Jan 21	**The Role of Theory in Science**	• Shoemaker et al. Chap 1 • Sutton & Staw (1995) • Weick (1995) • DiMaggio (1995) • Articles on Canvas	• Submit discussion questions due by 11:59 PM EST Tuesday, Jan 20
Week 3: Jan 28	**Theoretical Concepts, Issues in Measurement**	• Shoemaker et al. Chap 2 • Clark & Watson (2019) • Articles on Canvas	• **READINGS presentation: FILL IN** • Submit discussion questions by 11:59 PM EST Tuesday, Jan 27
Week 4: Feb 4	**Theoretical Statements Involving Two Variables, Theoretical and Operational Linkages**	• Shoemaker et al. Chap 3 & 4 • Articles on Canvas • Construct presentation articles (see Canvas)	• **READINGS presentation: FILL IN** • **CONSTRUCT presentation: FILL IN** • Submit discussion questions due by 11:59 PM EST Tuesday, Feb 3
Week 5: Feb 11	**Theoretical Statements Involving Three Variables**	• Shoemaker et al. Chap 5 • Fairchild & MacKinnon (2009) • Construct presentation articles (see Canvas)	• **READINGS presentation: FILL IN** • **CONSTRUCT presentation: FILL IN** • Submit discussion questions due by 11:59 PM EST Tuesday, Feb 10

Week 6: Feb 18	**Theoretical Statements Relating Four or More Variables**	• Shoemaker et al. Chap 6 • Muller et al. (2005) Construct presentation articles (see Canvas)	• **READINGS presentation: FILL IN** • **CONSTRUCT presentation: FILL IN** • Submit discussion questions due by 11:59 PM EST Tuesday, Feb 17
